## **DETAILED ACTION**

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on 3/7/07 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the patent 6795402 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Priority***

2. This application repeats a substantial portion of prior Application No. 09/429458 and 08/619934, filed 3/18/1996, and adds and claims additional disclosure not presented in the prior application. Since this application names an inventor or inventors named in the prior application, it may constitute a continuation-in-part of the prior application. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 13<sup>21</sup> rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As claims 1 and 13, the recitation "the samples taken at least at one of a rate and a resolution greater then is required to minimally detect digital transitions" is vague and indefinite

Art Unit: 2616

because it's unclear what is the values for the required rate and required resolution. Please clarify, so the meter and boundary can be determined.
